Subject: RE: MRAC update-- focus on local land-based contributions

Jill,

I wonder if this group would be willing / interested in making the priorities a bit more specific?
This is pretty general:

Developing, implementing and tracking dissolved oxygen and pH TMDLs. Looking to expand funding to increase the program for additional staff and evaluation of water quality criteria

Here's what I know: Ecology public noticed a DO TMDL for the Deschutes (freshwater) in April, and is working on a pH TMDL in the Lower White. There's also the South Sound DO effort (but that's not a TMDL). There may be other efforts that I don't know about....

Subject: FW: MRAC update-- focus on local land-based contributions

Hi Laurie, Jo and Gina,

Can you please take a look at this chart and see if you have any updates or additional info for the items in which EPA is referenced as a partner? Some involve the TMDL, 319 and sounds like Puget Sound programs. Thanks.

jill

FYI – EPA is referenced as a partner on some of these actions (e.g., 319) – do we have information to offer either on these or any new efforts?

Subject: MRAC update-- focus on local land-based contributions

Hi all,

At the next Marine Resources Advisory Council meeting (October 13 in Port Townsend), the discussion will focus on local land-based contributions of ocean acidification. As we have with other focus areas previously, we will be reviewing what progress has been made in fulfilling the Blue Ribbon Panel recommendations, as well as discussing what role MRAC can serve in supporting and advancing the targeted LLBC priorities that many of you helped to identify over the last year. I invite you to join us for what I hope will be a robust discussion. If you didn't already get a calendar invite from me, see the meeting details below.

In preparation for this discussion, we are working to update our table tracking current efforts related to the BRP recommendations, using the information you provided last year during our ad hoc committee calls (see attached). We'd love to get your expert review of this table to make sure it paints a complete picture of current efforts underway and the funding attached to them, particularly for efforts that might have been initiated since our conversations together. Please send me your feedback by **Friday, October 2**.

Please feel free, as always, to get in touch if you have any questions.

Best,

Angie

MRAC meeting details

Date and time:

October 13, 10:00 am – 3:30 pm

Meeting venue:

Washington Department of Fish and Wildlife

375 Hudson Street

Port Townsend, WA 98368
